

Time Switches

Key Benefits:

- Time switches with power reserve.
- 24 hour dial with 30 min. segments.
- Early manual over-ride switching for on and off without influencing the
- Permanent ON/OFF switch.
- Switching status indication.

Detail Description :

Nominal voltage : 230-240 V ~+6%-10%

Frequency : 50-60 Hz.

Power Consumption : Max. 10 VA.

Contact : Floating, gap less than 3 mm (μ).

Contact material : Ag SN O2

Switching Capacity : 16 A, 250 V ~, $\cos = 1$
10A, 250 V ~, $\cos = 0.6$.

Time base : Quartz

Accuracy : 1 Sec/day at 20°C.

Minimum switching time : 1 Minute.

Switching accuracy : accurate to the second.

Display : LCD-display (time, day of the week, summer/winter time, random switching, holiday program, switch position and manual switching, date operating mode).
